#### HOW TO MEASURE:

##### Chest Measurement

With elbows relaxed to your side, pull the measuring tape around you, measure under your arm pits and over the fullest part of your chest and shoulder blades.

##### Waist Measurement

Bend to one side to find natural indentation in torso. This is your natural waist. Keeping the measuring tape parallel to the ground, measure around your waist at the narrowest point of your torso. Make sure to keep one finger in between the tape and your body for a more comfortable fit.

##### Hip Measurement

Stand with your heels together and measure around the fullest part of your hips (approximately 7" to 9" below the waistline) keeping the measuring tape parallel to the ground.

##### Neck Measurement

Measure the circle of your neck. At the Adam's apple, keep it loose enough to fit a finger between the tape and your neck.
